# Electromagnetic Lock Installation User Guide (In-door Models)

Model Spec	MORTICE-300 w/o MAG. CTC.	MORTICE-300 c/w MAG. CTC.	MORTICE-600 w/o MAG. CTC.	MORTICE-600 c/w MAG. CTC.
Holding Force	Up to 300lbs (136 kg)	Up to 300lbs (136 kg)	Up to 600lbs (272 kg)	Up to 600lbs (272 kg)
Voltage Input	12VDC / 24VDC	12VDC / 24VDC	12VDC / 24VDC	12VDC / 24VDC
Current Draw	300mA / 150mA	300mA / 150mA	480mA / 240mA	480mA / 240mA
Dimension	(L)170 x (W)32 x (T)26 (mm)	(L)170 x (W)32 x (T)26 (mm)	(L)228 x (W)38 x (T)28 (mm)	(L)228 x (W)38 x (T)28 (mm)

## **Basic Installation Concept & Accessories**

### General Installation Steps & Maintainance

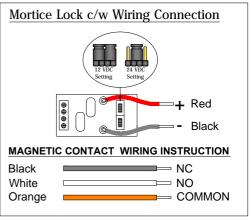

- 1. Open pocket hole for armature plate in the door frame using the sticker template provided.
- 2. Attach the armature plate to the door with the hardware provided as per the illustration.
- With the door closed, mark the door frame at the edge of the armature in order to properly align the electromagnet to the armature.
- $4.\ \mbox{Open}$  a pocket hole for mortice lock in the door frame as per size of model lock.
- 5. Attach the mounting brackets to the door frame using the screws provided.
- Insert the wires through the hole in the frame and into the electromagnet unit. Attach the electromagnet unit to the mounting brackets with the fixing screw.
- 7. Connect the power wires according to the instruction and test the system.
- 8. It is recommended that to apply a light coat of silicon lubricant to the mating surface on a monthly basis to prevent rust.

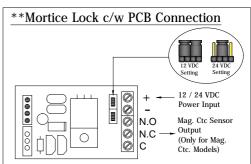

#### **Trouble Shooting**

- Sensor not functioning
  - Improper attachment of electromagnet and armature plate
  - Modification of the PCB
- 2. Door not locked
  - Incorrect wiring or no power from power supply
- 3. Reduced holding force
  - Poor contact of electromagnet and armature.
  - Be sure armature is loose enough that it can fully contact electromagnet along the entire length.
  - Mating surface is dusty or damaged.
  - Improper input voltage or wire size.

#### Note:

\*\*Special model upon request.

#### IMPORTANT!

Set the jumper position according to the power input correctly before switch  $\ensuremath{\mathsf{ON}}$  the power.
